

Rocky Mountain Lasers **Total Positioning Instruments**

SURVEY • GPS • LASERS • MACHINE CONTROL

With the ever changing technology of our industry, it is important for the consumer to find an equipment dealer they can trust. A specialist who is up-to-date with the latest in technical knowledge, a partner with integrity and the vision to collaborate with the customer in achieving company goals. Rocky Mountain Lasers is that business partner, providing our customers with the industry's highest quality products, quality service, and technical support.

Rocky Mountain Lasers' business philosophy has not changed since its inception. Larry Ames, Ames Construction stated, "As a contractor, you are only as good as the people who support you."

We truly believe this. We strive to be the industry leader by providing our customers with the proper training, both in the office and in the field. Our staff has over 90 years of combined experience in the sales and servicing of GPS, Machine Control and Surveying Equipment and Instruments. We service what we sell.

Our new location at 5385 Quebec Street in Commerce City, Colorado offers customers easy access to our large showroom displaying a full line of industry products. Our full service factory authorized service center is capable of servicing today's surveying and positioning equipment, oftentimes while the customer waits. Rocky Mountain Lasers provides technical support to meet our customers' needs. Our dedicated sales and service teams are available to support the customer in the office, in the field and on the job site. This personalized attention to our customers truly sets us apart from all others in our industry.

Brad Neeley

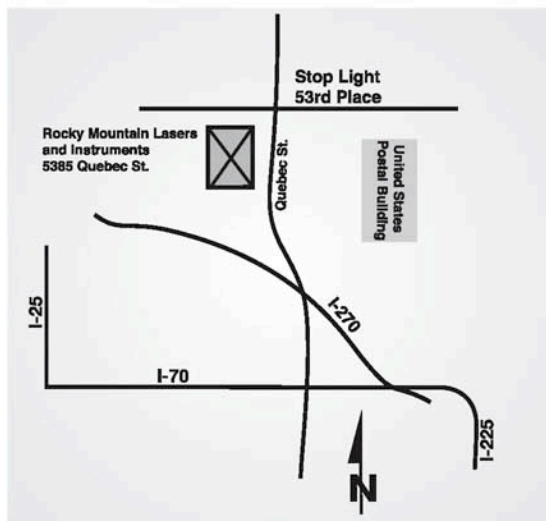

President

THE BEGINNING OF ROCKY MOUNTAIN LASERS

Rocky Mountain Lasers began in 1970 by laser industry pioneer Jack Richard. Jack was credited with many firsts in the early days, especially in working with utility lasers. Jack Richard owned Rocky Mountain Lasers until his retirement in 1991, and it continues today under the direction of Brad Neeley.

Rocky Mountain Lasers was the first company to sell laser systems to the construction, agriculture, and mining industries, throughout the rocky mountain region.

As RML grew, it purchased Total Positioning Instruments in 2001, and acquired the Topcon dealership representing the leading manufacturer in surveying, machine control, and GPS equipment. Rocky Mountain Lasers has established itself as the true leader in the industry, providing superior products and a dedicated local service center to customers throughout Colorado and the Rocky Mountain Region.
